

# Whatcom Manufacturing Inc. Injectorator

Making a pass

Available on any AerWay® Aerator. Our Injectorator is a great way to reduce odor up to 80%, reduces risks of run-off, reduces risk of ground water contamination, reduces fertilizer costs, yet improving yield!

Combined with our special chopper pump that thoroughly chops and pushes slurry through the injector tubes with pressure. Perfect for non stop clog free performance.

Models available with splash plates, or hoses and nozzles for the application you prefer.

Whatcom Manufacturing also carries a complete line of hose, fittings, hose reels, slurry pumps, lagoon agitators and more.
