# PROP AGITATORS

Whatcom Manufacturing has been producing quality built slurry agitators for over 18 years and continues to add new models for all types of applications. Our electric motor drive prop agitators have been installed at many dairies where maximum agitation using minimal horsepower is a concern.

## HEAVY DUTY CONSTRUCTION

Square tube stems with internal grease lubed bearings for long life and trouble free service. Our large diameter slow speed propellers, constructed from "Hardox 500" steel plate, are balanced for years of smooth running use. Total enclosed fan cooled motors with oversized V-belt drives will stand up to years of use in the toughest of conditions.

## MODELS AVAILABLE FOR ALL TYPES OF STORAGE FACILITIES

14' - 24' base plate mount for underground tanks to 15' depth.

20' - 30' long stem units accommodate above ground tanks or lagoons.

Vertical models for separator reception tanks.

## ELECTRIC & PTO DRIVE

Available with 5 HP through 30 HP electric drive or tractor PTO model.

For details on custom designed agitators to fit YOUR special needs, please don't hesitate to call on us. We CAN help!
