

Whatcom Manufacturing Inc. Soft Hose Reels

606

707

With a Northwest soft hose reel your irrigation main line becomes portable. One man can easily lay out any length of hose for fast and efficient slurry pumping or irrigation.

Models available in either 3 point mount or trailer style. There are many different sizes, as well as custom.

- 404 = 4' wide x 4' diameter
- 505 = 5' wide x 5' diameter
- 606 = 6' wide x 6' diameter
- 707 = 7' wide x 7' diameter

Hose capacity :

- 404 will hold approx. 1800' of 4" hose
- 505 approx 2500' of 6" or 3000' of 4" hose
- 606 approx 3500' of 6" hose
- 707 'commercial size' reel, holds a mile of 6" hose, or we can put in a divider and it will hold two 660' pull hoses on one side, and 4000' of 6" hose on the other side.

At Whatcom Manufacturing, Inc. We are committed to making sure every piece of equipment we produce satisfies the needs of our customers. With the customers in mind, the Northwest soft hose reel is available in a variety of sizes.
